Revision No. 57 JUL 10/2016

To: All holders of this Boeing Document D634A210

Attached is the current revision to the 737-800 SRM

The Structural Repair Manual (SRM) is furnished either as a printed manual or as digital products, or a combination of the two. This revision replaces all previous digital products. All products are reissued with all obsolete data deleted and all updated pages added.

For printed manuals, changes are indicated on the List of Effective Pages (LEP). The pages which are revised will be identified on the LEP by an R (Revised), A (Added), O (Overflow, i.e. changes to the document structure and/or page layout), or D (Deleted). Each page in the LEP is identified by Chapter-Section-Subject number, page number and page date.

Pages replaced or made obsolete by this revision should be removed and destroyed.

ATTENTION

IF YOU RECEIVE PRINTED REVISIONS, PLEASE VERIFY THAT YOU HAVE RECEIVED AND FILED THE PREVIOUS REVISION. BOEING MUST BE NOTIFIED WITHIN 30 DAYS IF YOU HAVE NOT RECEIVED THE PREVIOUS REVISION. REQUESTS FOR REVISIONS OTHER THAN THE PREVIOUS REVISION WILL REQUIRE A COMPLETE MANUAL REPRINT SUBJECT TO REPRINT CHARGES SHOWN IN THE DATA AND SERVICES CATALOG.

TEMPORARY REVISIONS

Remove any Temporary Revisions that have a date earlier than the date of this revision.

Do not remove any Temporary Revisions (TRs) that have a date later than the date of this revision. TRs with a later date will be incorporated into the next revision of the manual (unless they are superseded by a subsequent TR).

A TR status report is sent with each TR. The TR status report has a list of all TRs that were sent for this manual during the last two revision cycles. At the top of the list is the date and time that the list was created.

When you have more than one TR, the TR status report with the latest date and time gives you the most current information.

TRANSMITTAL LETTER

LOCATION OF CHANGE DESCRIPTION OF CHANGE

CHAPTER 51

51-00-20 Added Subject 51-00-20.

51-61-06

GENERAL Changed statement in Applicability section and paragraph 5.D.

51-70-02

GENERAL Added applicable parts that were not listed.

Changed reference from "Figure 3/GENERAL" to "Locations of the Principal Composite Components Made of Hybrid Carbon Fiber/Glass

Fiber Reinforced Plastic (CFRP/GFRP), Figure 3/GENERAL"

Added new locations.

CHAPTER 52

52-00-01

REPAIR 6 Added new data.

52-80-02

REPAIR 4 Changed the data to the procedure.

Changed reference from "Figure 202 (Sheet 6)" to "Figure 202

(Sheet 2)"

CHAPTER 53

53-00-01

ALLOWABLE DAMAGE 1 Added new data.

ALLOWABLE DAMAGE 5 Added new data.

REPAIR 36 Added 53-00-01-2R-36, Fuselage Skin General Skin Repairs Near or At

a Frame Shear Tie.

REPAIR 38 Changed the data to the procedure.

Changed data in procedure.

REPAIR 39 Changed data in procedure.

REPAIR 40 Changed the data to the procedure.

REPAIR 41 Changed data in procedure.

53-00-50

REPAIR 1 Changed data in procedure.

Changed reference from "Removal of the Damage, Figure 201/REPAIR 1" to "Removal of the Damage (LTM 23-1FR or BMS 9-3 along with

BMS 8-201, Type III or IV), Figure 201/REPAIR 1"

Changed reference from "Repair 1 - Layout of the Repair Parts - Glass Prepreg Fabric Repair, Figure 202/REPAIR 1" to "Repair 1 - Layout of the Repair Parts - Fabric Repair (LTM 23-1FR or BMS 9-3 along with

BMS 8-201, Type III or IV), Figure 202/REPAIR 1"

REPAIR 3 Changed data in procedure.

LOCATION OF CHANGE

DESCRIPTION OF CHANGE

REPAIR 3 (Cont)

Changed reference from "Removal of the Damage, Figure 201/REPAIR 3" to "Removal of the Damage (LTM 23-1FR or BMS 9-3 along with BMS 8-201, Type III or IV), Figure 201/REPAIR 3"

Changed reference from "Repair 3 - Layout of the Repair Parts - Glass Prepreg Fabric Repair, Figure 202/REPAIR 3" to "Repair 3 - Layout of the Repair Parts - Fabric Repair (LTM 23-1FR or BMS 9-3 along with BMS 8-201, Type III or IV), Figure 202/REPAIR 3"

REPAIR 4

Changed the data to the procedure.

Changed reference from "Removal of the Damage at an Edge, Figure 201/REPAIR 4" to "Removal of the Damage at an Edge (LTM 23-1FR or BMS 9-3 along with BMS 8-201, Type III or IV), Figure 201/REPAIR 4"

Changed reference from "Removal of the Damage at a Corner, Figure 202/REPAIR 4" to "Removal of the Damage at a Corner (LTM 23-1FR or BMS 9-3 along with BMS 8-201, Type III or IV), Figure 202/REPAIR 4"

Changed reference from "Procedure to Fill a Damage Area with Potting Compound at an Edge or Corner, Figure 203/REPAIR 4" to "Procedure to Fill a Damage Area with Potting Compound at an Edge or Corner (LTM 23-1FR or BMS 9-3 along with BMS 8-201, Type III or IV), Figure 203/REPAIR 4"

Changed reference from "Repair 4 - Layout of the Repair Parts - Glass Prepreg Fabric Repair at an Edge, Figure 204/REPAIR 4" to "Repair 4 - Layout of the Repair Parts - Fabric Repair at an Edge (LTM 23-1FR or BMS 9-3 along with BMS 8-201, Type III or IV), Figure 204/REPAIR 4"

Changed reference from "Repair 4 - Layout of the Repair Parts - Glass Prepreg Fabric Repair at a Corner, Figure 205/REPAIR 4" to "Repair 4 - Layout of the Repair Parts - Fabric Repair at a Corner (LTM 23-1FR or BMS 9-3 along with BMS 8-201, Type III or IV), Figure 205/REPAIR 4"

REPAIR 5

Changed the data to the procedure.

Changed reference from "Removal of the Damage at an Edge, Figure 201/REPAIR 5" to "Removal of the Damage at an Edge (LTM 23-1FR or BMS 9-3 along with BMS 8-201, Type III or IV), Figure 201/REPAIR 5"

Changed reference from "Removal of the Damage at a Corner, Figure 202/REPAIR 5" to "Removal of the Damage at a Corner (LTM 23-1FR or BMS 9-3 along with BMS 8-201, Type III or IV), Figure 202/REPAIR 5"

Changed reference from "Repair 5 - Layout of the Repair Parts - Glass Prepreg Fabric Repair at an Edge, Figure 203/REPAIR 5" to "Repair 5 - Layout of the Repair Parts - Fabric Repair at an Edge (LTM 23-1FR or BMS 9-3 along with BMS 8-201, Type III or IV), Figure 203/REPAIR 5"

Changed reference from "Repair 5 - Layout of the Repair Parts - Glass Prepreg Fabric Repair at a Corner, Figure 204/REPAIR 5" to "Repair 5 - Layout of the Repair Parts - Fabric Repair at a Corner (LTM 23-1FR or BMS 9-3 along with BMS 8-201, Type III or IV), Figure 204/REPAIR 5"

REPAIR 6 REPAIR 7 Added new data.

Added new data.

LOCATION OF CHANGE DESCRIPTION OF CHANGE

53-10-01

REPAIR 2 Added new data.

Changed the References list.

53-10-15

ALLOWABLE DAMAGE 4 Added new data.

53-10-51

IDENTIFICATION 2 Changed table.

REPAIR 10 Changed Dimensional Data.

53-30-01

IDENTIFICATION 1 Removed chem-mill from STA 420 to STA 480.

REPAIR GENERAL Added new data.

Added data to clarify repair locations.

53-40-07

IDENTIFICATION 1 Changed Figure 2.

53-60-01

IDENTIFICATION 1 Added data for the Tri-Band Antenna to the note text.

ALLOWABLE DAMAGE

GENERAL Added data for the Tri-Band Antenna to the note text.

REPAIR GENERAL Added data for the Tri-Band Antenna to the note text.

53-60-03

ALLOWABLE DAMAGE 1 Added data for the Tri-Band Antenna to the note text.

REPAIR 1 Added data for the Tri-Band Antenna to the note text.

53-60-07

IDENTIFICATION 1 Added data for the Tri-Band Antenna to the note text.

ALLOWABLE DAMAGE

GENERAL Added data for the Tri-Band Antenna to the note text.

REPAIR GENERAL Added data for the Tri-Band Antenna to the note text.

53-60-51

ALLOWABLE DAMAGE 1 Added allowable damage data.

Added the References list.

53-80-08

ALLOWABLE DAMAGE 5 Added new data.

CHAPTER 54

54-10-01

IDENTIFICATION 1 Added new data.

LOCATION OF CHANGE DESCRIPTION OF CHANGE

54-40-02

IDENTIFICATION 1 Added new part numbers to illustration and table.

REPAIR 6 Added 54-40-02-2R-6, Primary Exhaust System - Exhaust Nozzle

Fence and Doubler Elongated Fastener Hole Repair.

54-50-70

IDENTIFICATION 2 Added new thrust reverser strut fairing panel configuration.

54-70-90

ALLOWABLE DAMAGE 2 Added new data.

CHAPTER 55

55-20-01

REPAIR 3 Added new repair information.

CHAPTER 57

57-10-01

ALLOWABLE DAMAGE 1 Changed applicability data.

57-30-01

ALLOWABLE DAMAGE 1 Changed Figure 103.

57-42-01

ALLOWABLE DAMAGE 1 Changed allowable damage reference.

Changed typo.

57-51-02

REPAIR 3 Changed radius fillers temper from T651 to T6.

57-53-01

ALLOWABLE DAMAGE 2 Added new data.

SERVICE BULLETIN LIST

INTRODUCTION

1. General

- A. This Structural Repair Manual gives general data and special instructions for the repair of the Boeing 737-800 and 737-800 BBJ airplane structure. This manual gives general airplane data, usual procedures, and repair materials. This manual also includes material identification, allowable damage, and repair data for the airplane structure. Procedures usually done together with the structural repair (such as an airplane symmetry check or support of the airplane in the jigged position) are also given. This manual was made as specified in the Air Transport Association Specification 100 Specification for Manufacturer's Technical Data. The data in this manual which has an important effect on the airplane structure is approved by the Federal Aviation Administration.
- B. Some structural components that can be repaired are not included in this manual. It is possible that repairs are not given because a general repair was not easily applied to a specified structure. Also, it is possible that service experience has not shown that a repair is necessary for a specified structure. For some types of damage, an analysis by The Boeing Company is necessary before an applicable repair can be made. When an applicable repair is not found in this manual, look at these items:
 - Do a repair as specified in the general repair practices and procedures given in Chapter 51 of this manual.
 - (2) Prepare a special repair for damage not included in this manual.
 - (3) Replace the damaged part.
- C. This manual will change to include more approved repairs when the service experience shows a necessary repair for a specified structure.
- D. For the most important structural damage, it is recommended that the data in this manual be used together with aid from the Boeing Customer Support Representative. Refer to Paragraph 4 for instructions on how to use the data in this manual to make an order for structural spare parts.

2. Manual Arrangement and Number System (Refer to Figure 1.)

A. General

(1) The standard number system for Structural Repair Manuals is given in the Air Transport Association Specification 100 (ATA 100) - Specification for Manufacturer's Technical Data. This number system has three elements with two numbers in each element. The first element identifies the Chapter, the second element identifies the Section, and the third element identifies the Subject. Chapter numbers identify the fuselage, the wing, or other such large airplane structures. Section numbers identify the fuselage section 41, the wing center section, or other such smaller parts. Subject numbers identify the skin, the stringers, or other basic structural elements. Refer to Standard Number System, Figure/1 for a usual Chapter-Section-Subject number as follows:

B. Chapter Numbers

(1) The Chapter numbers and titles given in Table 1 identify the data included in this manual:

Table 1:

SRM CHAPTER NUMBERS AND TITLES						
CHAPTER NUMBER TITLE						
51	Standard Practices and Structures-General					
52	Doors					
53	Fuselage					

Table 1: (Continued)

SRM CHAPTER NUMBERS AND TITLES						
CHAPTER NUMBER	TITLE					
54	Nacelles/Pylons					
55	Stabilizers					
56	Windows					
57	Wings					

C. Section Numbers

- (1) The data in the Chapters is divided into specified Section numbers. Important structural differences between models are identified by special Section numbers.
- (2) Chapter 51 gives data for those subjects which are applicable to all of the airplane structure. Standard practices, general procedures, typical repairs, and other data applicable to more than one chapter is included in Chapter 51. The Chapter-Section numbers and titles given in Table 2 identify the data included in Chapter 51:

Table 2:

	Table 2.						
	CHAPTER-SECTION NUMBERS AND TITLES FOR CHAPTER 51

57-51	Trailing Edge		
57-53	Trailing Edge Flaps		
57-60	Ailerons		
57-70	Spoilers		

NOTE: Other important groups of data in Chapters 52-57, such as optional engines, are identified with a different fourth number in the Chapter-Section number.

D. Subject Numbers

- (1) In Chapter 51 the data included in a Chapter-Section is divided into Subject numbers given in a sequence.
- (2) In Chapters 52 through 57 the data included in a Chapter-Section is divided into specified Subject numbers. A given Chapter-Section will only use those subjects applicable to the structure included in that Chapter-Section of the manual. The Subject numbers and titles given in Table 4 identify the data included in Chapters 52 through 57:

Table 4:

SUBJECT NUMBERS AND TITLES FOR CHAPTERS 52 THRU 57				
CHAPTER SECTION SUBJECT NUMBER	TITLE	CHAPTER SECTION SUBJECT NUMBER	TITLE	
5X-XX-00	General	5X-XX-50	Floor Panels	
-01	Skins and Plates	-51	Floor Structure	
-02	Structure Complete	-52	Seat Tracks	
-03	Stringers and Skin Stiffeners	-53	Cargo Compartment Special Structure	
-04	Intercostals			
-05	Longerons			
-06	Formers	-54		
-07	Frames	to	Not Used	
-08	Bulkheads	-69		
-09	Ribs	-70	Fillets and Fairings,	
-10	Spars		Skins and Plating	
-11	Intermediate, Auxiliary and Subspars	-71	Fillets and Fairings, Structure	
-12	Keel Structure	-72	Radomes and Antenna	
-13	Beams		Fairings	
-14	Landing Gear Support	-73		
-15	Door Surround Structure	to	Not Used	
	1	1	1	

Table 4: (Continued)

SUBJECT NUMBERS AND TITLES FOR CHAPTERS 52 THRU 57				
CHAPTER SECTION SUBJECT NUMBER	TITLE	CHAPTER SECTION SUBJECT NUMBER	TITLE	
-16	Edge Members	-89		
-17 to -29	Not Used	-90 -91 to	Attachment Fittings Not Used	
-30	Auxiliary	-99		
-31 to -49	Not Used			

NOTE: Attachment fittings identified in -90 are fittings with a lug (with a bushing or bearing), links, braces, and hinge fittings (with a bushing or bearing). Other fittings (backup, structural) such as door stop fittings, jack fittings, and splice fittings are identified in the applicable Subject (Example: -10 for spars).

- E. Topics, Figure Numbers, and Page Numbers
 - (1) In Chapter 51 the data included in a Chapter-Section-Subject is divided into topics with figure numbers and page numbers given in Table 5 below:

Table 5:

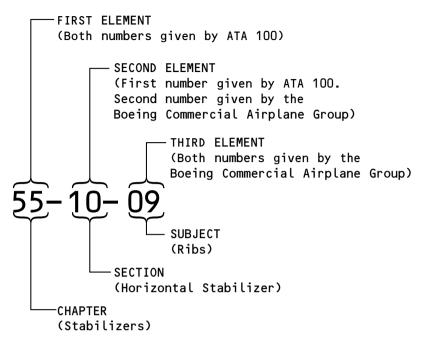

TOPIC, FIGURE, AND PAGE NUMBERS FOR CHAPTER 51				
CHAPTER 51 TOPIC	FIGURE NUMBER	PAGE NUMBER		
General Information	Figure 1-99	Page 1-99		
Repair General	Figure 201-999	Page 201-999		
Repair 1, 2, 3,	Figure 201-999	Page 201-999		

(2) In Chapters 52 through 57 the data included in a Chapter-Section-Subject is divided into topics with figure numbers and page numbers given in Table 6 below:

Table 6:

Tubio 0.

3. How To Use The Manual (Refer to Figure 2)

CAUTION: MAKE SURE THAT YOU DO ALL OF THE STEPS TO THE END OF THE PROCEDURE. LARGE BLANK SPACES CAN OCCUR AT THE BOTTOM OF PAGES WHICH DO NOT ALWAYS INDICATE THAT YOU ARE AT THE END OF THE PROCEDURE. IF YOU DO NOT MAKE SURE THAT YOU HAVE COMPLETED THE PROCEDURE, DAMAGE TO EQUIPMENT OR SYSTEM MALFUNCTION COULD OCCUR.

A. Identify the material of the damaged part. Refer to the applicable material identification data in this manual. For the example used before, in 55-10-09, the topic "Identification 1 - Horizontal Stabilizer Forward Box Ribs" gives the identification data for the damaged part.

NOTE: The material identification tables and some of the figures give reference drawing numbers. Refer to these reference drawings when the applicable structure is not identified.

- B. Find the allowable damage data for the damaged structure. Refer to the Manual Arrangement and Number System in the Introduction of this manual. Also refer to the List of Chapters for this manual and to the Table of Contents in the applicable chapter. As an example, if the damaged part was a rib in the forward box of the horizontal stabilizer, the allowable damage data is found as follows:
 - (1) The List of Chapters for this manual shows that data on Stabilizers is included in Chapter 55.
 - (2) The Table of Contents for Chapter 55 shows that all data on the Horizontal Stabilizer is included in the Chapter-Section 55-10-XX. The data on Ribs is given in Chapter-Section-Subject 55-10-09. The topic "Allowable Damage 1 - Horizontal Stabilizer Forward Box Ribs" gives the allowable damage data for the damaged part.
- C. Find the repair data for the damaged structure. For the example used before, in 55-10-09, the topic "Repair 1 Horizontal Stabilizer Forward Box Ribs" gives the repair data for the damaged part.
- D. Unless specified differently, all dimensions in this manual are given in inches.

How to Use the Manual Figure 2

4. How to Use the Manual for Spare Parts Identification

- A. This Structural Repair Manual can be used to make an order for structural parts. This procedure can be used when structural parts are not easily identified from drawings or the Illustrated Parts Catalog.
- B. The procedure that follows can be used to get a kit of structural spare parts from the Commercial Spares Department.
 - (1) Make a copy of the page which identifies the damaged structural component.
 - (2) Show all of the damaged components on the applicable pages with a color or a shade. For structure shown only in a left-hand view, identify the left-hand or the right-hand structure.
 - (3) Give photographs.
 - (4) Give the airplane model and serial number.
 - (5) Send a completed Purchase Order with the data to: Boeing Commercial Airplane Group Spares Department P.O. Box 3707 Seattle, Washington, USA 98124-2207
 - NOTE: Identification of the structural damage and the necessary replacement items can be done quickly by SITA, ARINC, TWX (telex), Rapifax (facsimile), or direct distance dialing (telephone). Refer to the necessary structural parts with the Chapter-Section-Subject and page number from this manual together with any other data on the page that identifies the part.
- C. After the data and Purchase Order are received by the Spares Department, the necessary parts will be sent as a kit. Parts sent and not necessary can be sent back to The Boeing Company for credit.

5. Publications Change Requests

A. To get more details about the data in this manual, write to this address: Boeing Commercial Aviation Services P.O. Box 3707 Seattle, Washington 98124-2207 U.S.A. Attention: Director, Retrofit Engineering and Overhaul Support

Use a Publications Change Request (PCR) form to make sure that your request is sent to the applicable Boeing organization. Boeing makes the PCR form available through your publications organization.

6. Revision Service

- A. This Structural Repair Manual is changed by Revision Service. A List of Effective Pages (LEP) will be given with each revision. Two types of Revision Service are used:
 - · Normal Revision
 - Temporary Revision The two types of Revision Service are given as follows:
 - (1) Normal Revision Service
 - (a) The usual time for Normal Revision Service is each four months. A List of Effective Pages (LEP) and a Transmittal Letter are sent with each Normal Revision. The Transmittal Letter includes Highlights that give the causes for the changed data. Changed pages are identified on the LEP with these letters to the left of the page number: R = Revised Page A = Added Page D = Deleted Page O = Overflow Page The changed data is identified by a revision bar at the left side of each new or changed page. Pages sent again without a technical change are identified by a short revision bar at the lower left side of the page.
 - (2) Temporary Revision Service
 - (a) Temporary Revision Service is used to quickly send data and instructions before the date of the next Normal Revision. Most Temporary Revision data will be included in a Normal Revision before 120 days after the date of the Temporary Revision.

- (b) Temporary Revisions will not be revised. If changes are necessary, a new Temporary Revision will be issued.
- (c) The Temporary Revisions that are incorporated, canceled, or active are given in the Transmittal Letter that is sent with each Normal Revision.

7. Standard Tools

A. Tools in this manual that are identified with an ST prefix are designed by The Boeing Company. Detail drawings of these tools are available by request.

8. Significant Rework Log (SRL)

- A. This log supplies the customer with important rework data which occurred when the airplane was assembled. This log was made by Boeing Engineering Liaison and Customer Product Assurance. This log can also be used by the customer to make record of important rework that can occur during the life of the airplane.
- B. When you see a reference to -M (Dash M) part numbers in this Structural Repair Manual (SRM), it is an indication of earlier Material Review Board (MRB) activity. The necessary data can often be found in the Significant Rework Log (SRL). The -M part numbers identify unique parts which are different from the standard production parts. The -M parts are usually identified with the regular part number, immediately followed by a letter then followed by a dash () and the associated nonconformance record number (For Example: 65C25592–5M-120442D).

NOTE: For multiple -M parts in an assembly or area, consecutive letter identifications (For Example: -N, -P, -Q) may be used. The letter 'O' is never used for a -M part number.

9. Service Bulletins

A. The service bulletins that have been used to make or change the data contained in this manual are given in the Service Bulletin List.

10. Effective Aircraft Identification

- A. The Effective Aircraft List (EAL) gives the airplane effectivity identification and is provided for reference only. Missing or incorrect data in the EAL does not invalidate the use of this manual. The EAL shows the relation of these items:
 - Airplane Type and Model (shown as Model-Series)
 - Variable Number (shown as Block Number)
 - · Serial Number
 - Production Cumulative Line Number (shown as Line Number)
 - Registry Number (shown as Registration Number)
- B. Effectivity identification is used to show differences in the airplane configuration. Data in this manual without effectivity identification is applicable to all airplanes. Examples of effectivity identification are given as follows:
 - (1) Production cumulative line numbers such as:
 - LINE NUMBERS: 1 THRU 24 (used in a note)
 - 1 THRU 24 (used in the material list effectivity column) identify the data as applicable to those airplanes with line numbers in the specified group.
 - (2) Special equipment is used to identify some data as applicable to those airplanes with the specified equipment. An optional cargo door or other such easily identified equipment is used for effectivity identification.
