NON-DESTRUCTIVE TEST MANUAL

Revision No. 119
JUL 01/2016

To: All holders of this Boeing Document D6-37239

Attached is the current revision to the 737 Non-Destructive Test Manual.

The Non-Destructive Test Manual (NDT) is furnished either as a printed manual or as digital products, or a combination of the two. This revision replaces all previous digital products. All products are reissued with all obsolete data deleted and all updated pages added.

For printed manuals, changes are indicated on the List of Effective Pages (LEP). The pages which are revised will be identified on the LEP by an R (Revised), A (Added), O (Overflow, i.e. changes to the document structure and/or page layout), or D (Deleted). Each page in the LEP is identified by Chapter-Section-Subject number, page number and page date.

Pages replaced or made obsolete by this revision should be removed and destroyed.

ATTENTION

IF YOU RECEIVE PRINTED REVISIONS, PLEASE VERIFY THAT YOU HAVE RECEIVED AND FILED THE PREVIOUS REVISION. BOEING MUST BE NOTIFIED WITHIN 30 DAYS IF YOU HAVE NOT RECEIVED THE PREVIOUS REVISION. REQUESTS FOR REVISIONS OTHER THAN THE PREVIOUS REVISION WILL REQUIRE A COMPLETE MANUAL REPRINT SUBJECT TO REPRINT CHARGES SHOWN IN THE DATA AND SERVICES CATALOG.

TEMPORARY REVISIONS

Remove any Temporary Revisions that have a date earlier than the date of this revision.

Do not remove any Temporary Revisions (TRs) that have a date later than the date of this revision. TRs with a later date will be incorporated into the next revision of the manual (unless they are superseded by a subsequent TR).

A TR status report is sent with each TR. The TR status report has a list of all TRs that were sent for this manual during the last two revision cycles. At the top of the list is the date and time that the list was created.

When you have more than one TR, the TR status report with the latest date and time gives you the most current information.

NON-DESTRUCTIVE TEST MANUAL

INTRODUCTION

1. **General**

   A. Detection of structural damage and defects before they deteriorate to critically dangerous proportions is a necessity in assuring the structural integrity of all aircraft. Inspection techniques developed for discovery of such defects in the Boeing Jet family are presented in this manual: X-ray, for examination of hidden areas in which disassembly for visual inspection is expensive and time consuming; eddy current and ultrasonic for examination of individual components for internal flaws and surface flaws not normally visible. As other methods of nondestructive inspection are developed, and found applicable, they will be added to this manual. As existing techniques are reviewed and refined, the manual will be revised to include the latest procedures developed.

   B. The Boeing Company is pursuing an aggressive program to improve the techniques of nondestructive testing. To this end, all airlines are urged to contribute new techniques which they have developed for inclusion in this manual. Forward such information through the Boeing Field Service representative, or send directly to:

   Boeing Commercial Airplanes Company

   Customer Support

   P.O. Box 3707

   Seattle, Washington 98124

   CAUTION: MAKE SURE THAT YOU DO ALL OF THE STEPS TO THE END OF THE PROCEDURE. LARGE BLANK SPACES CAN OCCUR AT THE BOTTOM OF PAGES WHICH DO NOT ALWAYS INDICATE THAT YOU ARE AT THE END OF THE PROCEDURE. IF YOU DO NOT MAKE SURE THAT YOU COMPLETED THE PROCEDURE, DAMAGE TO EQUIPMENT OR SYSTEM MALFUNCTION COULD OCCUR.

   C. The fact that a procedure for inspection is contained in this manual must not be construed as a requirement for inspection. Furthermore, where a requirement for an inspection has been established, the procedure for that inspection shown in this manual is not mandatory. The intention is to provide operators with a proven inspection procedure that can be adapted to suit their own equipment or their particular airplane configuration. Alternative inspection techniques may be equally satisfactory, but the procedures given have been developed and used on airplanes.

   D. The 737 NDT inspection procedures have been deleted from D6-7170 Nondestructive Test Manual, and are included in this document. Because this new manual will contain only 737 pages, the requirement to identify them using the -37 subject number system no longer exists. Therefore, all pages except the -00 (common pages) are renumbered using the standard ATA-100 numbering system. This eliminates the requirement for identifying the various subjects as Figures. For example; the subject formerly identified as Part 2, 53-10-37, Fig. 4, now becomes Part 2, 53-10-04. Detail I of that subject now becomes Fig. 1.

   E. Pages in this document with subject numbers ending with -00 are common with pages in D6-7170 and have the same revision dates.

2. **Arrangement of Manual**

   A. This manual is arranged in the standard format laid out by the Air Transport Association in Specification ATA-100. Fig. 1 shows the layout of the manual in schematic form.

B. Arrangement of the manual is in nine parts. Part 1 presents general applications and general information pertaining to each type of nondestructive testing. Parts 2 thru 9 present specific information and procedures pertaining to each test category in detailed and pictorial form. Since airline personnel who perform these tests are necessarily well trained in nondestructive testing equipment use, no effort is made to include instructions for operating the various types of equipment. However, specific operating procedures are suggested, where applicable, in Parts 2 thru 9.

INTRODUCTION

3. **Subject Numbering**

    A. Each part of this manual uses the three-element ATA-100 number system. The first element identifies the ATA chapter, the second identifies the section and the third element identifies the subject number. A typical example is shown in Figure 1.

    B. Some procedures have the same three-element numbers. These procedures will be identified as Procedure 1, Procedure 2, etc.

4. **List of Effective Pages**

    A. A List of Effective Pages (LEP) appears at the front of this manual which lists all of the pages contained in the manual and indicates the date which each page was last revised.

5. **Supporting Technical Data**

    A. For each basic airplane model a cross-reference is provided in this introduction which identifies those procedures in this manual which correspond to Maintenance Planning Data (MPD), Service Bulletin, Supplemental Structural Inspection Document (SSID) numbers or Damage Tolerance Rating (DTR) Form.

    B. It must not be construed that any of the procedures in this manual satisfy the complete inspection requirements of the Maintenance Planning Document or Supplemental Structural Inspection Document for High-Time Model 737 Aircraft; or are mandatory. The procedures described only represent the suggested method of performing the portion of the inspection which is adaptable to NDT methods.

6. **Publications Change Requests**

    A. Communications concerning this publication should be directed to the Boeing Commercial Airplane Company; Attention: Supervisor Commercial Publications. For uniform handling and to direct routing of your questions to the proper Boeing organization, use the Publications Change Request (PCR) form. Boeing makes this form available to your publications organization.

7. <u>**Procedure Number Changes that were made during the November 15, 2012 Revision**</u>

    A.   Before the November 15, 2012 revision, some procedures in the 737 NDT Manual, D6-37239, were identified as Figures. Because of a publishing system change, the term "Fig." was changed to "Procedure" in the November 15, 2012 revision. The technical instructions were not changed." Table 6 identifies the procedure number changes that occurred during the November 15, 2012 revision.
